EXPERIENCE

Stock Streets

Apr 2026 – Present

Freelance Frontend Developer

Remote

- Developed and maintained a web-based Paper Trading Platform for stock market learners, enabling users to practice trading strategies in a simulated trading environment.
- Built responsive and interactive user interfaces using HTML, CSS, JavaScript, and React.js to deliver an intuitive user experience.
- Integrated stock market data APIs and developed analysis dashboards to help students track performance and understand market trends.
- Implemented multiple stock analysis and reporting modules, providing actionable insights for educational and research purposes.
- Collaborated directly with clients to gather requirements, implement features, optimize UI/UX, and deliver production-ready solutions.

QSpiders Software Training Institute 

Aug 2025 – Jan 2026

Full Stack Development Training

Ahmedabad, Gujarat

- Completed Full Stack Development training covering Python, SQL, React.js, and modern web technologies including HTML, CSS, JavaScript, and Tailwind CSS.
- Gained hands-on experience in building responsive web applications with strong fundamentals in OOPS, database design, backend integration, and real-time mini projects.

CS Vision 

May 2025 – June 2025

React JS Developer Intern

Remote

- Developed responsive and interactive user interfaces using HTML, CSS, JavaScript and React.js.
- Built reusable components and implemented component-based architecture following modern frontend practices.

PROJECTS

1. UrbanSync – Society Management Platform [↗](#)

01 2026

Technologies: React.JS, JavaScript, Tailwind CSS, Firebase, Chart.js

Backend & Database: Firebase Authentication, Firestore, Firebase Hosting

- Developed a role-based Society Management Platform to streamline community operations, communication, and maintenance management for residential societies.
- Implemented secure authentication and authorization using Firebase Authentication with separate access levels for Members, Admins, and Super Admins.
- Built modules for complaints, maintenance tracking, notices, events, polls, expense management, and resident profile management with real-time data synchronization.
- Designed responsive dashboards and analytics using React.js, Tailwind CSS, and Chart.js to provide actionable insights for society administrators.
- Deployed the application on Firebase Hosting with Firestore integration, ensuring scalability, security, and reliable cloud-based access.

2. Sales Ticket System [↗](#)

12 2025

Technologies: HTML, Tailwind CSS, JavaScript, React.JS, Node.js, Express.js

Database: MySQL

- Developed a full-stack role-based Sales Ticket Management System with secure authentication, protected routing, and complete ticket lifecycle management using Express.js and MySQL.
- Built modules for ticket creation, assignment, status tracking, and reporting to streamline sales operations and improve workflow efficiency.
- Designed responsive user interfaces using React.js and Tailwind CSS with role-based access control and secure route protection.
- Deployed the frontend on Netlify and the backend with a cloud-connected MySQL database on Railway, ensuring scalable and efficient performance.
